

Position: Project Engineer

Period of engagement- 6 month

Location- Delhi (But comfortable to visit different cities/sites, based on requirement)

Program: PASS - *Pani aur Swachheta mein Sajhidari* (Partnership for WASH)

Area of focus: WASH (Water, Sanitation & Hygiene) in low-income urban settlements

Reporting to: Director, CURE

Job profile/Responsibilities:

- Conduct field investigation, reconnaissance surveys, site screening, geo-technical and topographical surveys and undertake collection, collation and analysis of data;
- Develop and design small-scale On-Site Sanitation (OSS) and Decentralized Wastewater Treatment System (DWATS), and monitor and manage their implementation;
- Prepare project proposals and DPRs for Decentralized Wastewater Treatment and Fecal Sludge Management systems as required under the program;
- Prepare Annual Environmental Mitigation and Monitoring Plans (EMMP) for the program, ensure its application in program activities, monitor and report the impact and results;
- Conduct capacity building and technical training workshops for state and urban local bodies' functionaries;
- Work in close coordination with Program Managers and field facilitators to implement program activities and monitor results;
- Work in close coordination with Programme Managers in preparation of BOQ and Drawing and in execution of work as per the drawing and BOQ specification.
- Document the interventions, collect lessons learnt, and prepare briefing notes, case studies and success stories for dissemination.
- Work in close coordination with project manager in checking the variation in quantities if any and finding the reasons for the same.

Other duties/additional tasks:

- Reporting as per program requirements; and
- Any other work assigned by the Director, CURE;
- The job requires occasional travel to other project sites within the country.

Key Requirements:

- A Bachelor's degree in Engineering or Technology with 8-10 years' experience.
- Field based work experience of a minimum of five years.
- Self-motivated and responsible, able to work independently.
- Ability to learn and be a team player.
- Applicable Software knowledge is essential
